

SOW

Scope of Work:

Workflow:

Student Interface (Website)

1. Homepage
 - a. Header:
 - i. The header of the homepage should include the website's logo, navigation menu, and search bar.
 - ii. The navigation menu should allow users to easily access different sections of the website such as courses, pricing, and about us.
 - b. Banner:
 - i. The banner of the homepage should include an eye-catching image or video, along with a clear and concise headline that highlights the benefits of the website's courses.
 - ii. It can also include a call-to-action button that encourages users to explore the courses.
 - c. Course Categories:
 - i. This section can provide an overview of the different categories of courses offered on the website, such as math, science, physics, chemistry, biology.
 - ii. It can also include brief descriptions of each category and the types of courses included.
 - iii. Featured Courses:
 1. This section can highlight some of the most popular or highest-rated courses on the website.
 2. It can include images of the courses and brief descriptions.
 - d. Teacher Profiles:
 - i. This section can showcase the teachers or instructors who teach the courses on the website.
 - e. Subscription Plans:

- i. This section can provide details about the different pricing plans available for the courses, including any discounts or promotions currently offered.
 - ii. It can also include a comparison of the features and benefits included in each plan.
 - f. About Us:
 - i. This section can provide information about the company or organization behind the website, including its mission, history, and values.
 - ii. It can also include information about the team members, partnerships, and any accolades or awards received.
 - g. Contact Us:
 - i. This section can provide ways for users to contact the website's customer support team, such as through email, phone, or live chat.
 - ii. It can also include a frequently asked questions (FAQ) section that addresses common concerns or inquiries.
 - h. Teacher application
 - i. Teacher application form includes personal details, educational qualifications, teaching experience, and any other relevant information.
 - ii. Before the form is submitted the teachers should be required to accept the terms and conditions regarding the safekeeping of data of the application.
 - iii. When teachers submit an application form, the admin will revert them for scheduling further processes.
 - i. Terms and Conditions:
 - i. The following page should have the detailed terms and conditions mentioned.
- 2. User Account section
 - a. Account creation
 - i. Account creation can be done by contact number or through email address.
 - ii. Student Registration
 - 1. Full Name
 - 2. Guardians Name
 - 3. Phone Number
 - 4. Email Id
 - 5. DOB
 - 6. Class/Grade
 - 7. Board
 - 8. City
 - 9. Book a Trial Class
 - 10. Book a tuition Slot
 - iii. Student Login
 - 1. Login ID (Emailed/Phone Number)
 - 2. Password (8 digit/alphabet/special characters)

- b. Personal Information:
 - i. This section should allow users to view and update their personal information, such as their name, email address, phone number, and billing address.
 - ii. It can also allow users to add or remove payment methods and view their transaction history.
 - c. Progress tracking
 - i. Course Progress:
 - 1. This section should allow users to view their progress in each course they have enrolled in, including their current status, grades, and completion percentage.
 - 2. It can also include a timeline or calendar that shows upcoming assignments, tests, or projects.
 - ii. Certificates:
 - 1. This section can provide access to any certificates or badges earned by the user for completing courses or achieving specific milestones.
 - 2. It can also allow users to download or share these certificates on their social media profiles or resumes.
 - d. Notifications:
 - i. This section can allow users to manage their notification preferences, including email or text message notifications for course updates, assignments, and deadlines.
 - ii. It can also allow users to set reminders or alerts for upcoming events or tasks.
 - e. Privacy and Security:
 - i. This section can provide information about the website's privacy and security policies, including how user data is collected, stored, and protected.
 - ii. It can also allow users to manage their privacy settings and opt-out of any data sharing or marketing activities.
- 1. Live Classes:
 - a. Live Classroom:
 - i. This section should provide a virtual classroom or meeting space where the live class will take place including whiteboard and live quiz.
 - ii. It can use a video conferencing platform such as Zoom or Google Meet to allow the teacher and students to interact and communicate in real-time.
 - iii. White board - two way writing by teacher and student.
 - iv. Video calling option (screenshot disabling)
 - v. Presentation sharing
 - vi. Chat with teacher/student

- vii. Call recording option and sharing for later reference.
 - viii. Live quizzes.
- b. Class Materials:
 - i. This section can provide access to class materials such as videos, slides, notes, handouts, or other resources that will be used during the live class.
 - ii. The teachers will be uploading notes, handouts, daily quizzes and homework documents.
 - iii. No downloading of learning materials or screenshots.
 - iv. Revision assignments with scores.
 - v. Result and progress.
 - vi. Ask a query to a teacher via chat or message.
 - vii. Students should be able to upload documents and that should be shared with the teacher for asking any kind of help in Home work/Query.
- c. Recording:
 - i. This section can provide a recording of the live class for students who were unable to attend or who wish to review the material again.
 - ii. There should be auto/manual recording and saving of sessions.
- d. Feedback:
 - i. This section can allow students to provide feedback on the live class, including their experience, the quality of the instruction, and any suggestions for improvement.
 - ii. It can also allow the teacher to provide feedback to the students, either during or after the live classes.

Admin (Web Panel)

1. Admin will onboard teacher after onboarding teacher , teacher will get login credentials which allows teacher to take live classes.
2. User Management:
 - a. This module is essential for managing user accounts, onboarding, roles, permissions, and access to different features of the platform.
 - b. The admin should be able to view all the details of tutors along with hours of classes taught.
 - c. The admin shall be able to manage scheduling of tutor to a particular student for 1:1 classes.
3. Course Management:
 - a. This module allows administrators to create, manage, and publish courses, including course materials, assignments, quizzes, and assessments.
4. Content Management:
 - a. This module is used to manage various types of content, such as videos, articles, images, and other multimedia assets used in courses.

5. Analytics:
 - a. This module provides insights into user engagement, course completion rates, and other metrics that can help administrators improve the platform.
6. Payment and Billing:
 - a. This module is used to manage subscriptions, payments, refunds, and other financial transactions on the platform.
7. Support and Helpdesk:
 - a. This module is used to manage user inquiries, complaints, and support tickets.
8. Communication and Notifications:
 - a. This module allows administrators to send messages, notifications, and announcements to users through various channels such as email, SMS, and push notifications.
9. Security and Privacy:
 - a. This module is essential for managing security and privacy settings, including authentication, authorization, data encryption, and compliance with data protection regulations.
10. Integrations:
 - a. This module is used to integrate the edtech platform with other software tools and services, such as Learning Management Systems (LMS), content management systems, and video conferencing platforms.
11. Student Management:
 - a. This module allows users to view their students' profiles, including their names, email addresses, and progress in the course.
 - b. View Active Subscriptions
12. Teacher Management
 - a. In the case of a tutor, change the possibility to link the student with the new tutor along with all the documents, assignments and progress.
13. Tutor Payment Management
 - a. All tutor details visible along with hours of classes taught
 - b. Payment calculator of teacher
 - c. Payment History
 - d. Due amount for teachers

Teacher (Website)

- Tutor Registration:
 - Full Name
 - Phone Number
 - DOB
 - Email Id
 - City

- Educational Qualification
 - Work Experience
 - Uploading CV and academic /work experience documents.
- Teacher Login ID:
 - Login using email id and mobile number
 - Password (8 digit/alphabet/special characters)
- Details Visible to teacher:
 - Students assigned along with time slots.
 - Study material to be shared with the students grade-wise.
 - Chat with students.
 - Document uploaded by the students/Homework
 - Uploading daily quizzes.
