WHY WE NEED FOOD?

We eat food to:

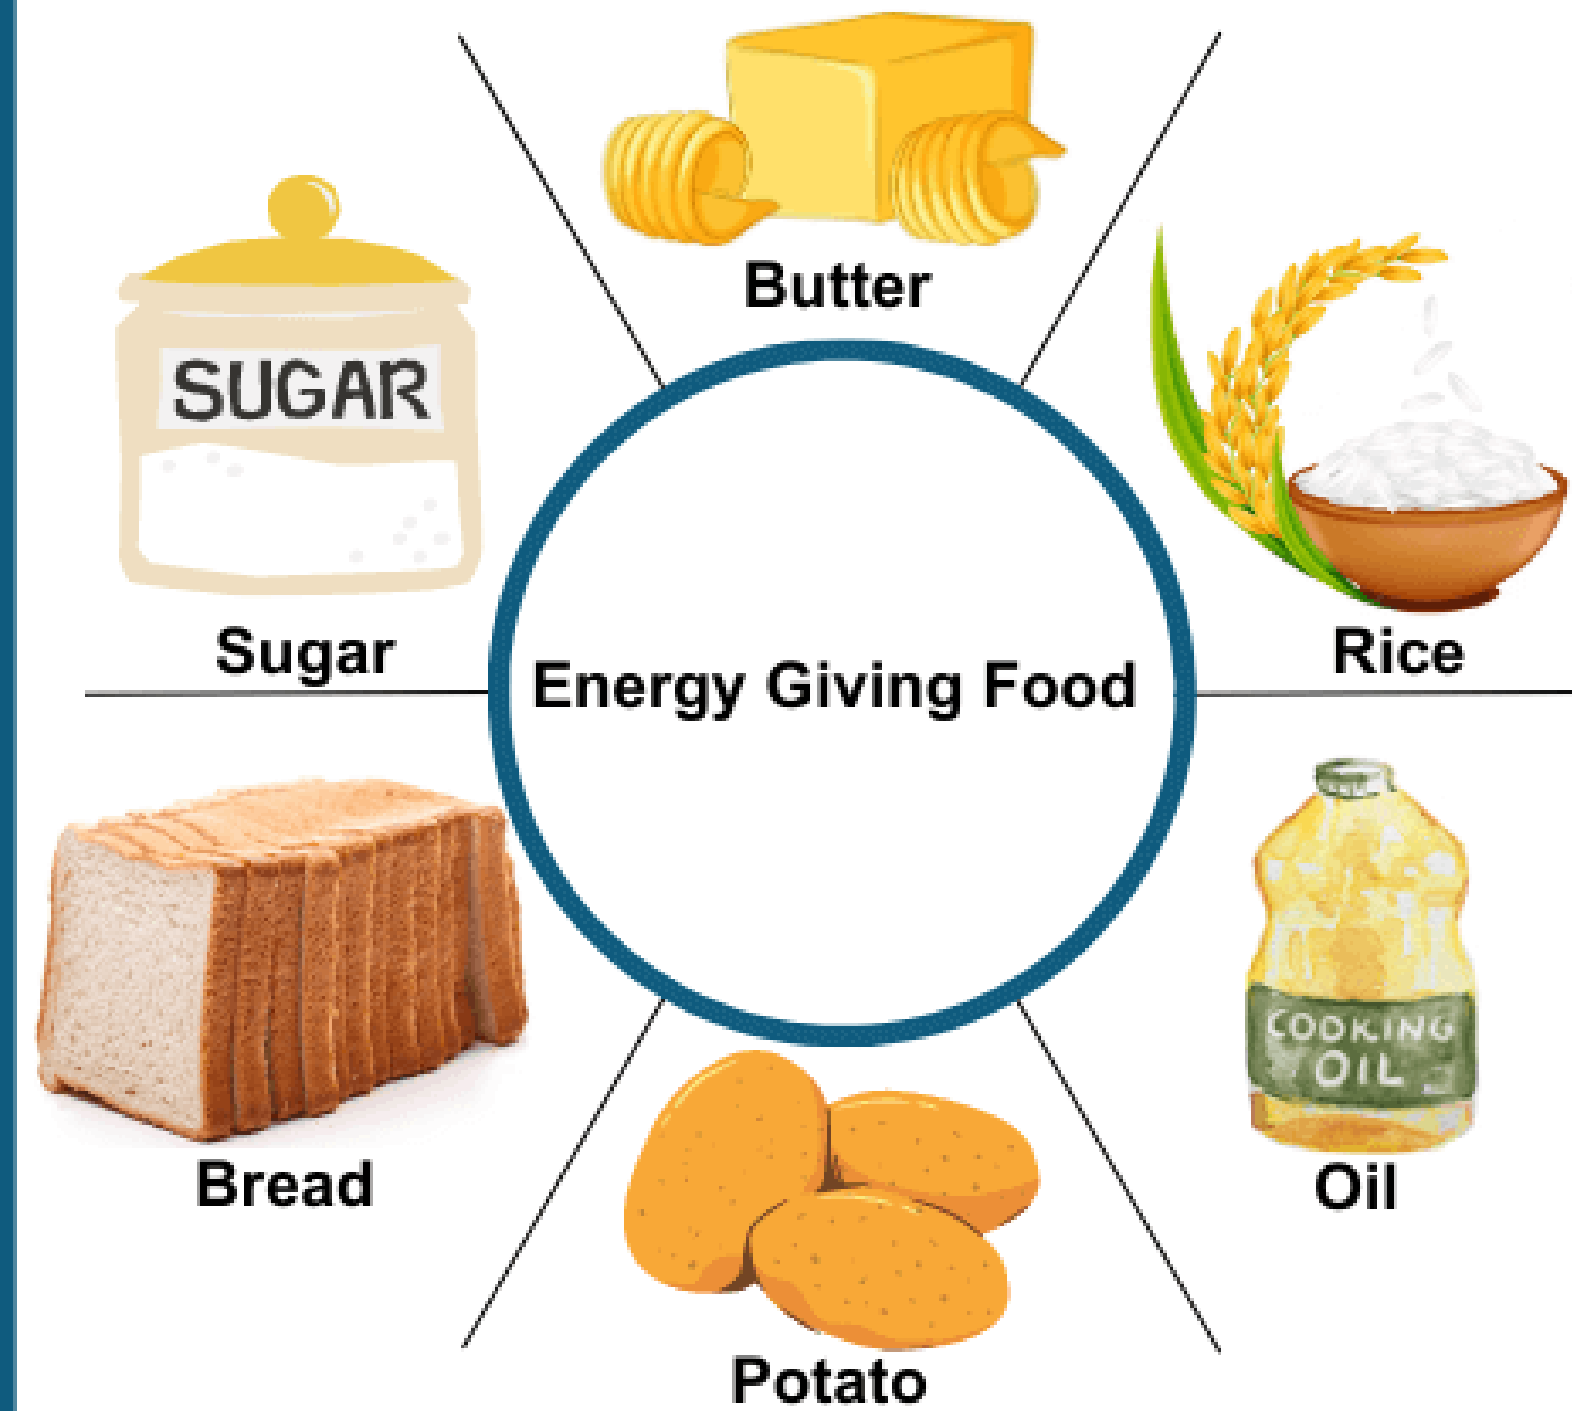

- **Get energy** to play and learn 🏆 🧠
 - **Grow** strong and tall 🏋️
 - **Stay healthy** and fight diseases 🛡️
- 🧠 **Olympiad Tip:** Foods help build our body, give energy, or protect us!

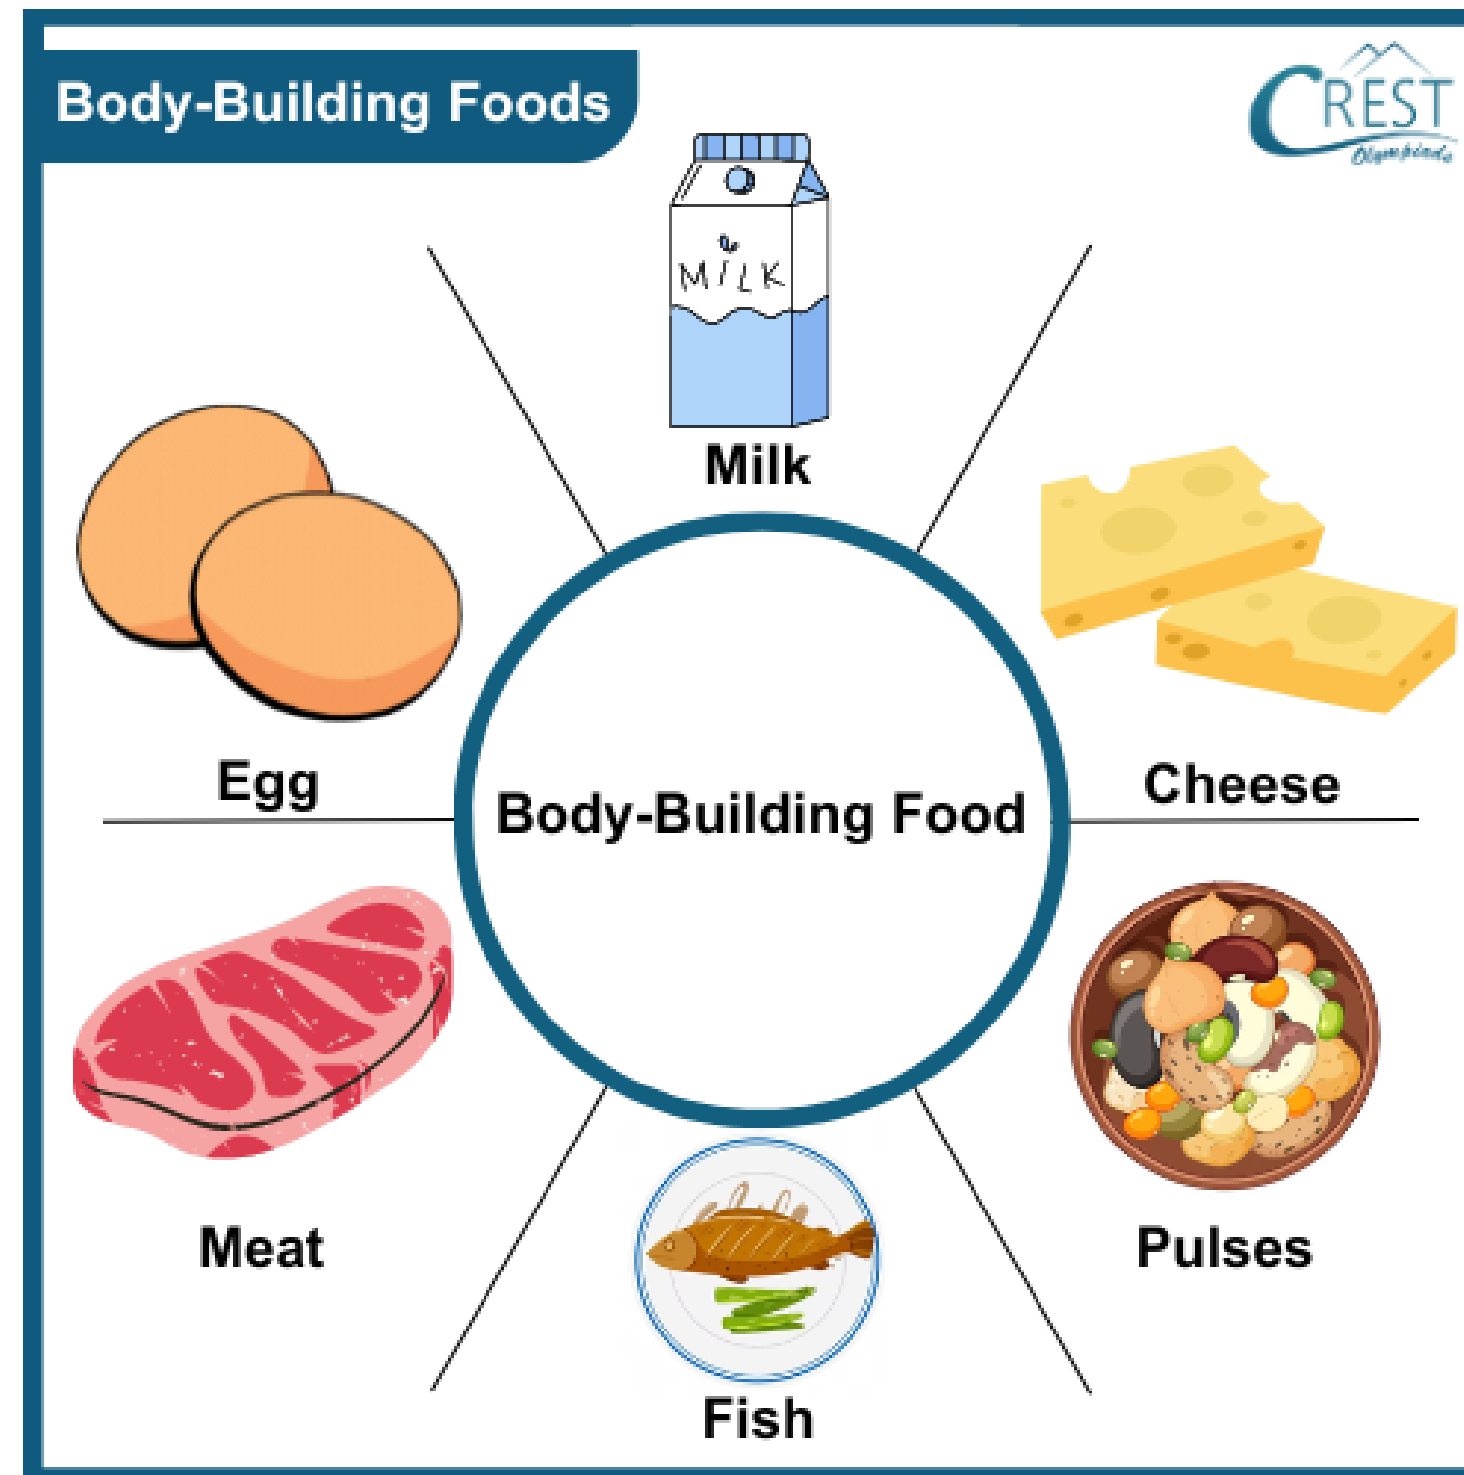

TYPES OF FOOD

Food Type	Function	Examples
Energy-Giving Food	Gives energy	Rice, Wheat, Potato 🍚 🍠
Body-Building Food	Builds muscles	Milk, Eggs, Meat 🥚 🥛 🍗
Protective Food	Fights diseases	Fruits, Vegetables 🍊 🥬

Energy Giving Food

Fruits

Vegetables

Protective food?

- Fruits and veggies give **vitamins** and **minerals**
- Keep our eyes, skin, and bones healthy
- Help in healing wounds 
-  Examples: Carrot (vitamin A), Orange (vitamin C), Spinach (iron)

Food pyramid

The **food pyramid** shows which foods to eat:

- **Bottom layer:** Eat most – Fruits, veggies 🍎 🥕
 - **Middle layer:** Eat some – Rice, dairy, protein 🍳 🥛
 - **Top layer:** Eat less – Sweets, oily and junk food 🍩 🥤
- 🧠 Olympiad Clue: **Cake, chips, cold drinks** go at the top – eat rarely.

Sources of food

Food from Plants

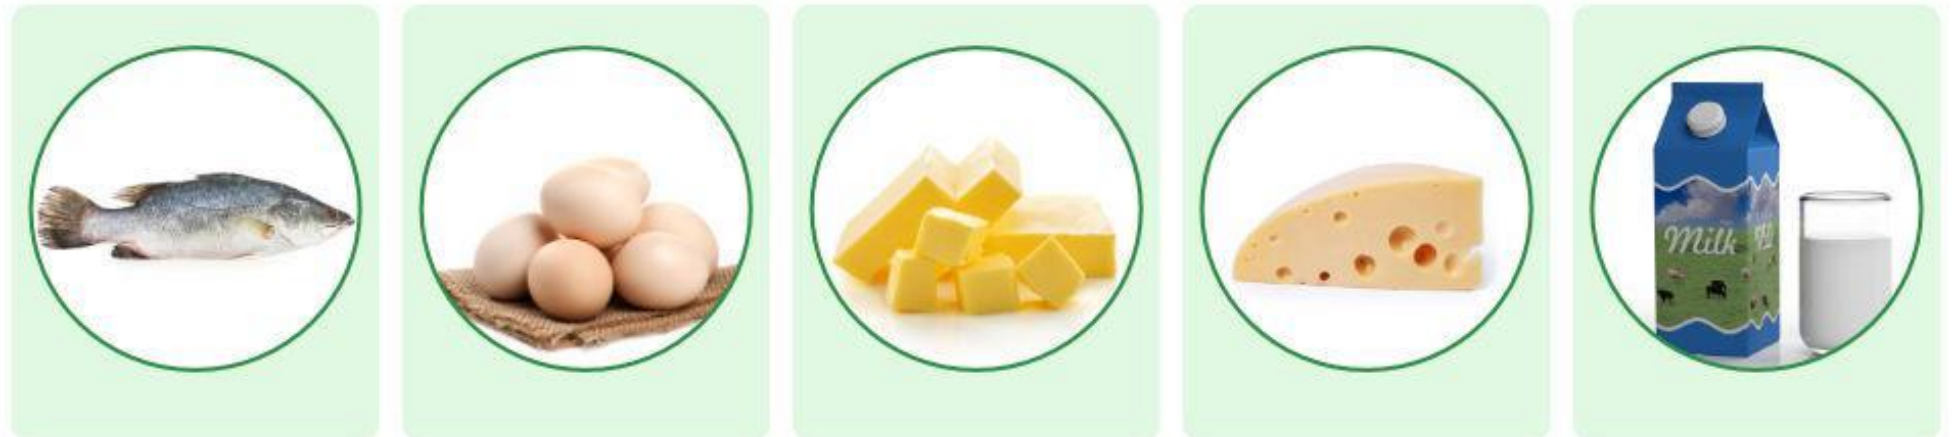

•**From Plants:** Rice, Fruits, Vegetables, Oil

•**From Animals:** Milk, Eggs, Meat, Honey

🧠 HOTS: Honey is from **bees**, not plants – watch out for “*odd one out*” style questions!

Food from Animals

What is balanced diet?

A **balanced diet** means:

- ✓ Includes all 3 food types
- ✓ Has enough water
- ✓ Keeps us fit and strong
- ✗ Cold drinks, candy = Not part of a balanced diet!

Healthy/Junk Food

Junk Food:

- ✗ Cakes, candies, burgers, cold drinks
- Tasty but not healthy
- Can cause illness if eaten often

Healthy Food:

- ✓ Dal, fruits, nuts, vegetables
- Make our body strong
- Full of nutrients

Thanks
