THE HUMAN BODY

- The **human body** is like a **smart machine**.
- It is made of:
 - Bones** 
 - **Muscles** 
 - **Organs** 
 - **Systems** 
- All parts work **together** to help us **live, move, and grow**!
- 🧠 *Olympiad Tip:* Each part has a **special function**.

MAJOR ORGAN SYSTEM

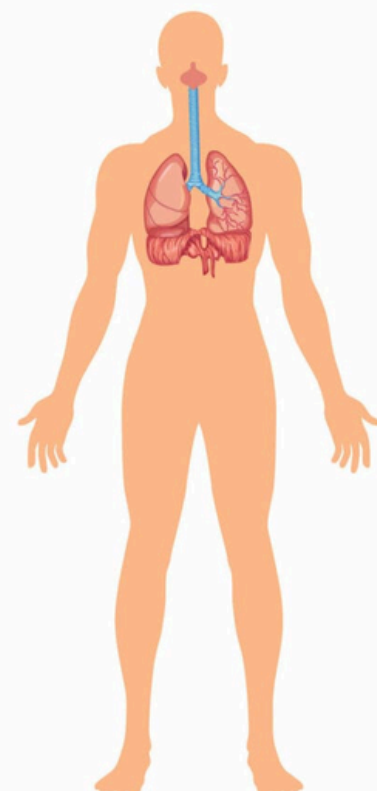

System	Function	Important Parts
Skeletal	Gives shape and support	Bones, Skull, Ribs 
Muscular	Helps in movement	Muscles 
Digestive	Digests food	Stomach, Intestine 
Respiratory	Helps us breathe	Lungs, Nose 
Circulatory	Pumps blood	Heart, Blood Vessels 
Nervous	Controls all body activities	Brain, Nerves 

 ***Match-the-following questions often come from here!***

Human Body Organ Systems

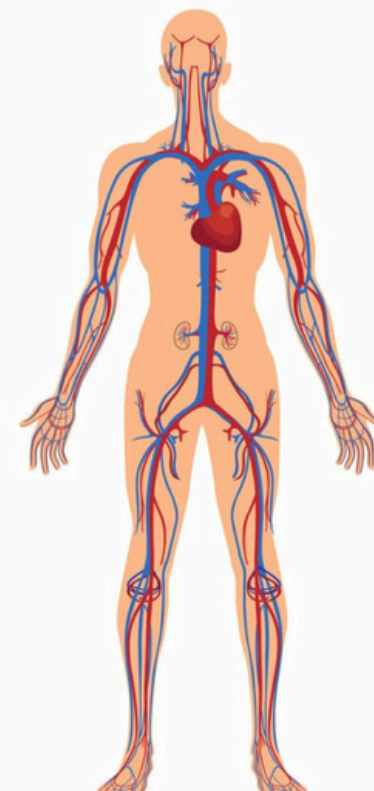

Skeletal System

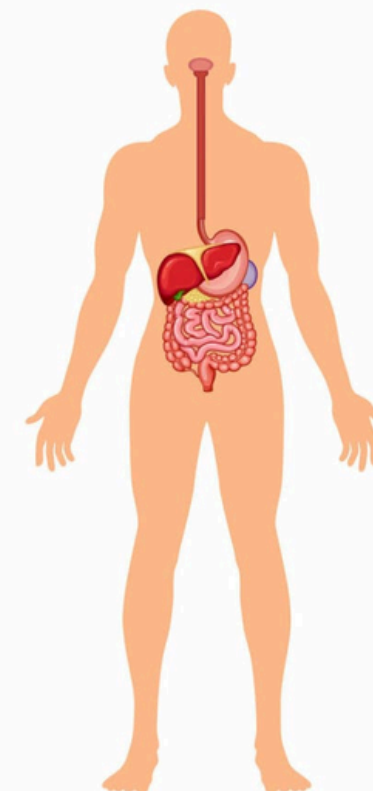

Respiratory System

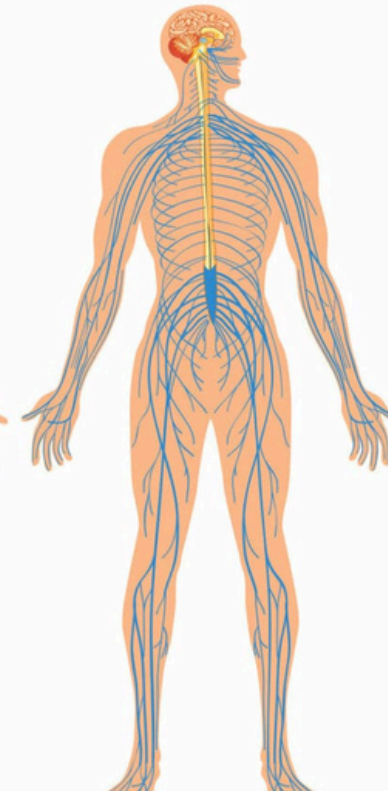

Muscular System

Circulatory System

Digestive System

Nervous System

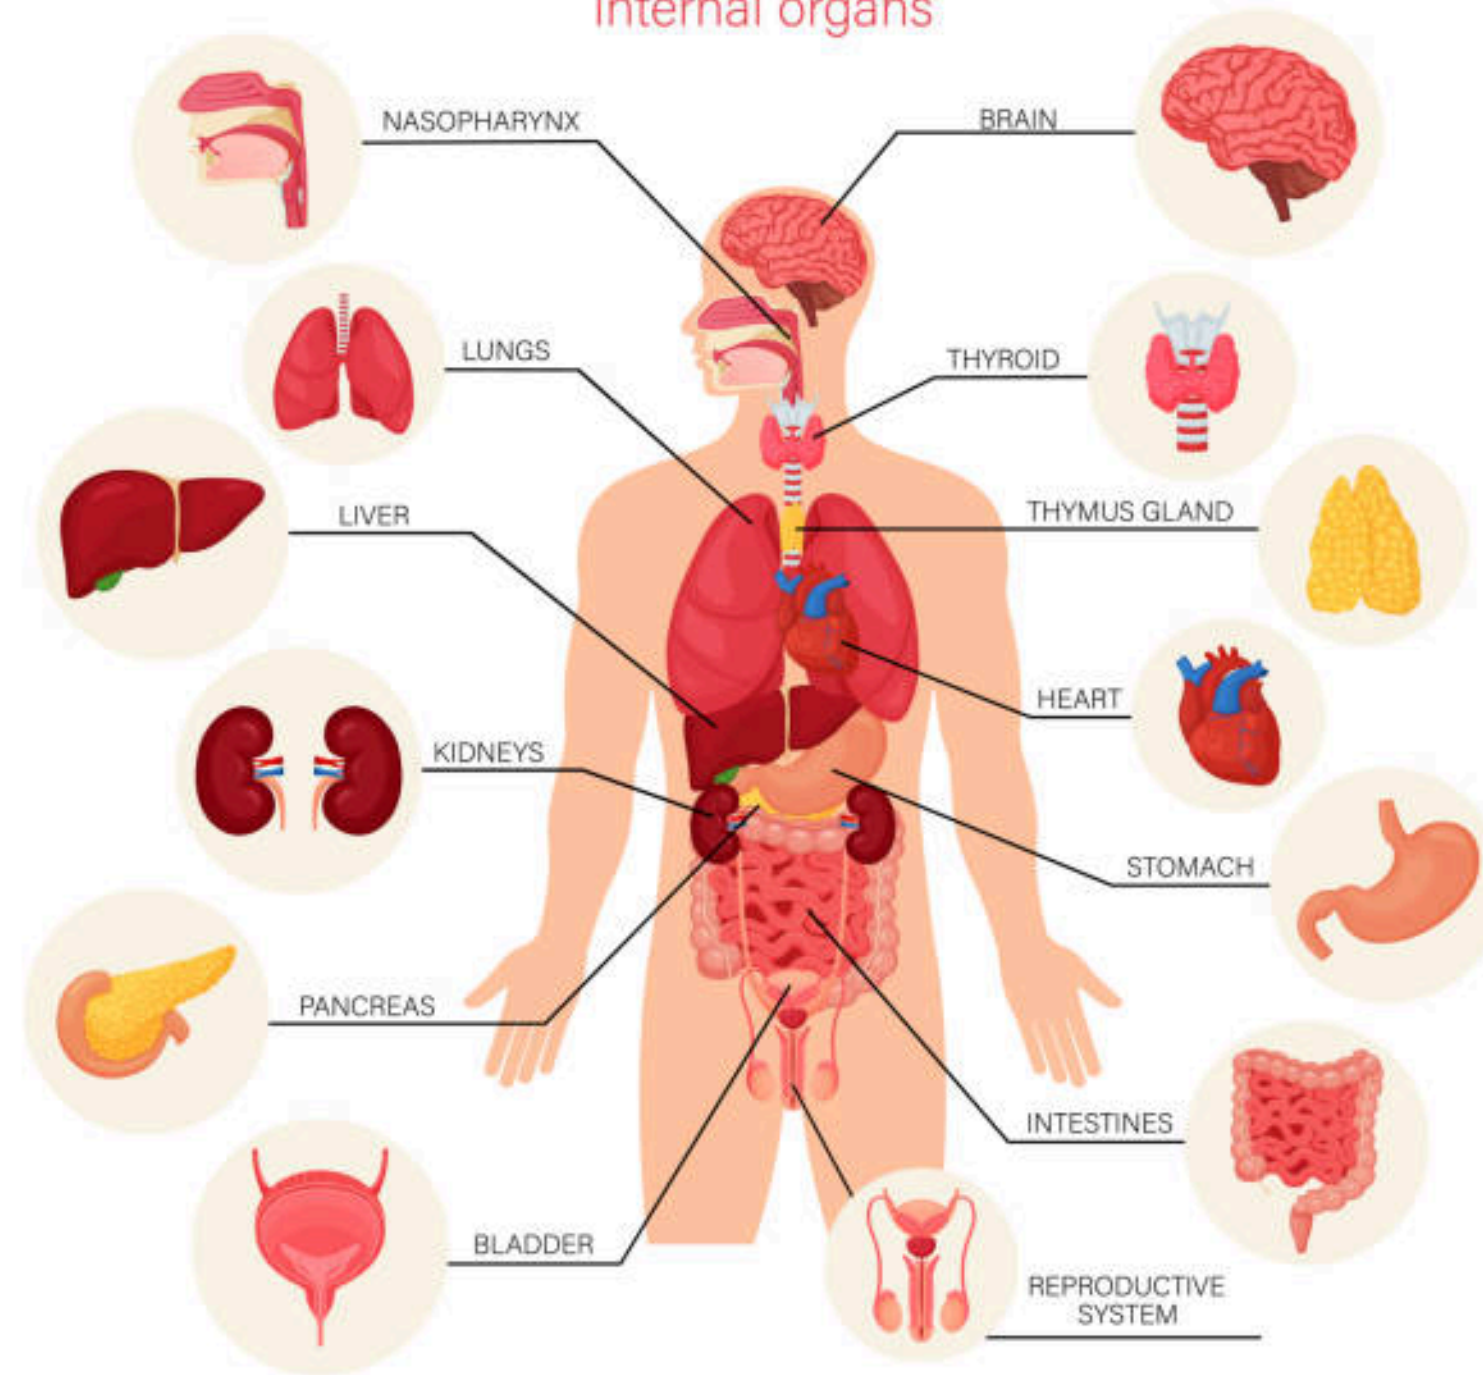

organs

Organ	Function
Brain	Controls body, helps us think 🧠
Heart	Pumps blood to all body parts ❤️
Lungs	Help us breathe 🫁
Liver	Removes toxins and keeps us clean 💉
Kidneys	Filter waste from blood 🚽

🧠 **Olympiad Tip:** The skull protects the brain!

THE HUMAN BODY

Internal organs

SENSE ORGANS

Sense Organ

Eyes

Ears

Nose

Tongue

Skin

What It Does

See 👁️👁️

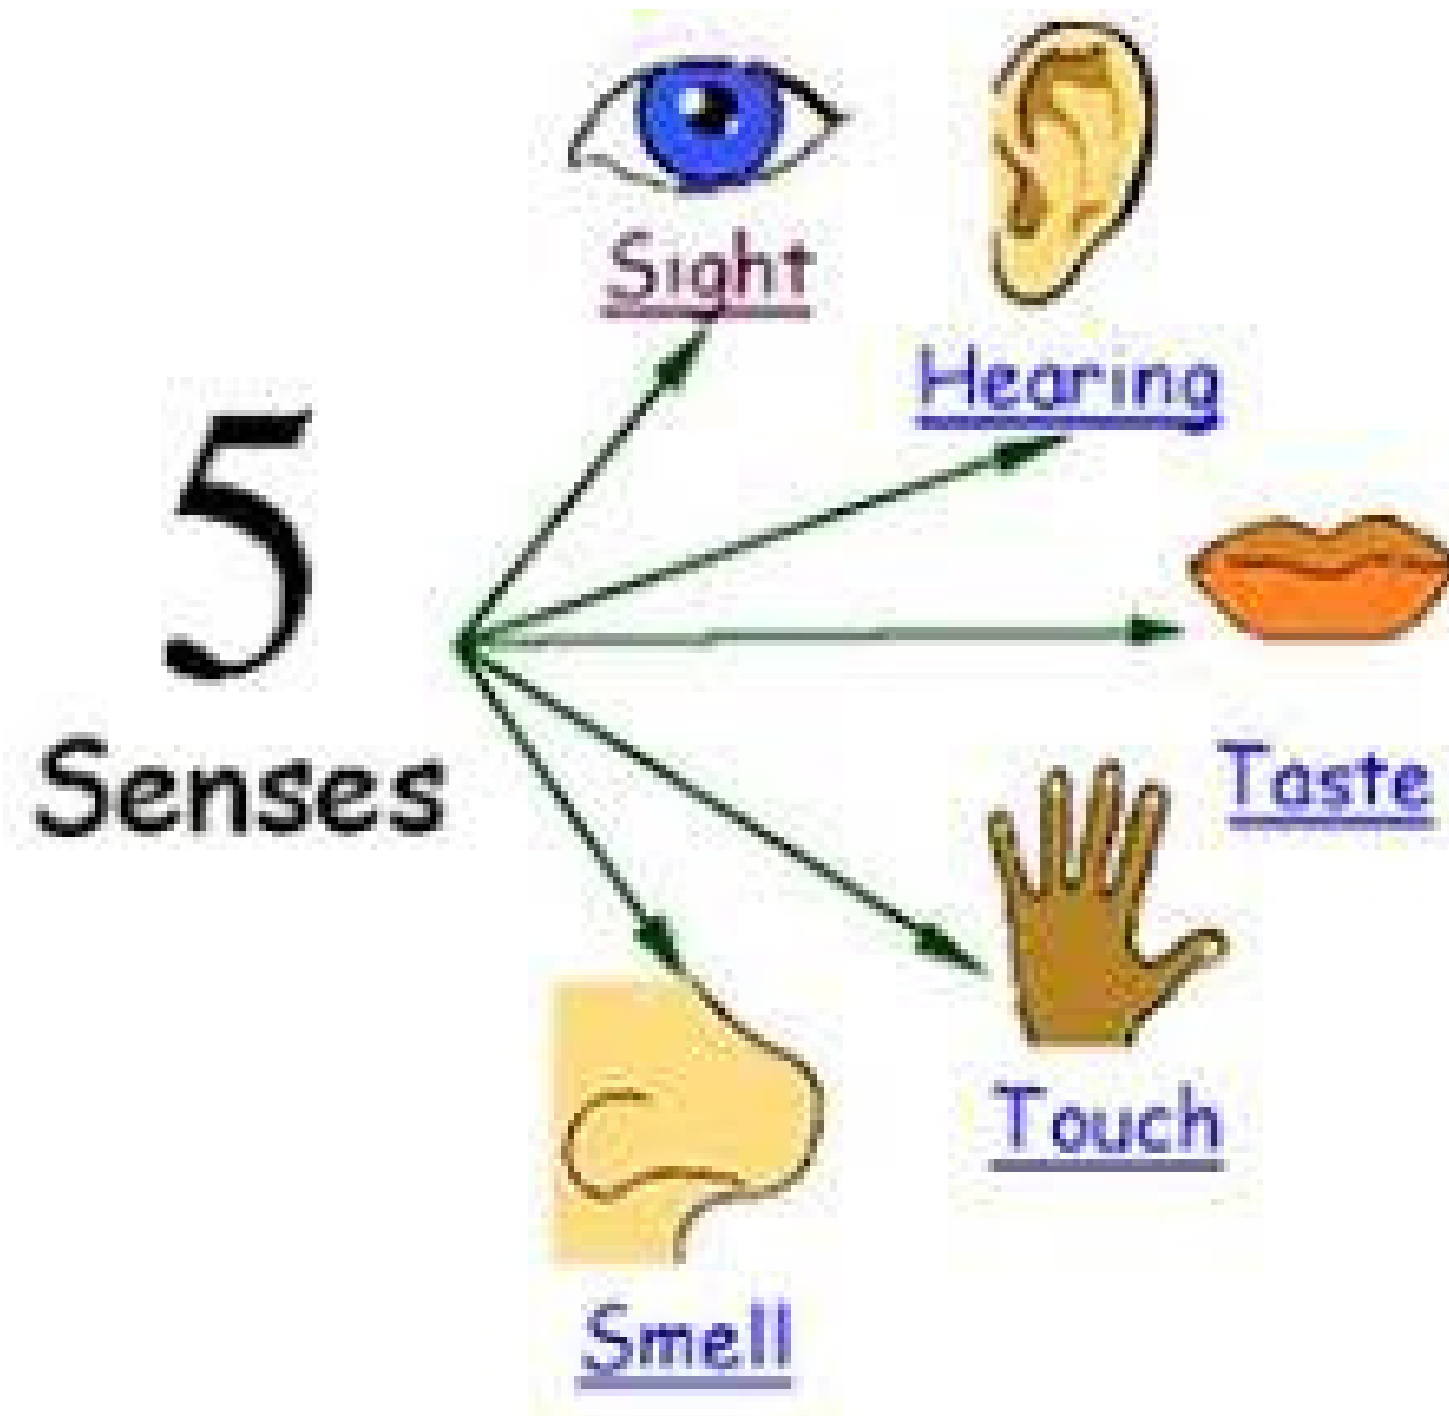

Hear 👂

Smell 👃

Taste 👅

Touch 🖐️

 ***Olympiad Example*** Cold blocks your **sense of smell!**

BONES AND MUSCLES

- Bones form the **skeleton** of our body
 - Muscles help us **move** and do actions
 - Some muscles (like **heart muscles**) work even when we sleep!
-  *Olympiad Insight:* Heart muscles are **always active**!

THE HUMAN BODY

- Good posture means **sitting and standing correctly**
 - Helps keep bones and muscles strong
 - We should:
 - Sit straight 
 - Sleep on time 
 - Eat healthy food 
 - Exercise regularly 
-  *Olympiad Trap:* Bending over books = **bad posture!**
